

## EGG TRAY technical data

Capacity  
30 eggs

Dimensions  
294x294x48 mm

Weight  
110 gr

Cleaning temp  
80° C

Colors  
yellow, orange, blue, green

The Ovotrays are plastic egg trays built with a food safe polypropylene copolymer especially conceived for any alimentary use.

Flexible but strong, they can be easily washed and disinfected up to 80°C, quick drying.

Each Ovotray can hold 30 eggs up to 90 gr and measures 294x294x48 mm.

Thanks to the planar construction and the very precise joints, they are easily and quickly stackable, any accidental egg breaking is very unlikely.

They are quite adaptable to the all types of machines without need for any modification.

They are built with non-toxic and UV resistant colored plastic, not painted.

They can be produced in any desired color and, on request, customized with an embossed name or logo.

A standard 90x120 cm pallet accomodates 3000 Ovotrays.
